

Activity 1 – Model Providers and Models Released in the Last 12 Months

Provider	Model	Release Date	Knowledge Cutoff	Context	Type	When to Use
OpenAI	GPT-5.5	Apr 2026	Dec 2025	128K	Multimodal	General reasoning, coding, agents
Google	Gemini 2.5 Pro	Mar 2025	Jan 2025	1M	Multimodal	Long-context reasoning
Anthropic	Claude Opus 4.8	May 2026	Jan 2026	200K	Multimodal	Research & coding
xAI	Grok 4.5	Jul 2026	Dec 2025	1M+	Multimodal	Reasoning
Meta	Llama 4 Maverick	Apr 2025	Aug 2024	1M	Open-weight	Local deployment
Alibaba	Qwen3.7 Max	May 2026	Apr 2026	128K	Open-weight	Coding & multilingual
DeepSeek	DeepSeek V4	Apr 2026	Apr 2026	1M	Open-weight	Low-cost coding
Mistral AI	Mistral Medium 3.5	Apr 2026	Apr 2026	128K	Multimodal	Enterprise AI
Moonshot AI	Kimi K3	Jul 2026	Feb 2026	256K	MoE	Long-context
Cohere	Command A+	May 2026	Apr 2025	256K	Enterprise	RAG & search

Activity 2 – Understanding Transformers

Self-Attention Mechanism

Helps the model understand relationships between words by considering the entire context instead of processing words one by one.

Vector Embedding

Converts text into numerical vectors while preserving semantic meaning, enabling similarity search and understanding.

Feed Forward Neural Network (FFN)

Processes each token after the attention layer to learn more complex patterns and improve representations.

Activity 3 – Professional Networking on LinkedIn

Objective: Connect with fellow learners through LinkedIn.

Activity Completed:

- Shared my LinkedIn profile in the official WhatsApp group.
- Connected with fellow learners by accepting and exchanging LinkedIn connection requests.
- Started building a professional network for continuous learning, knowledge sharing, and future collaboration.

Outcome: Successfully initiated professional networking with fellow learners and expanded my LinkedIn network.
