SCRUM-6 - Consultant Dashboard My Inpatients

Story Title *

Consultant Dashboard My Inpatients

Summary *

Consultant Dashboard My Inpatients

Description

As a user, I want to consultant dashboard my inpatients so that the related functionality works as expected.

Acceptance Criteria *

Given a user with valid access, when they open the dashboard, then relevant data and visualizations should be displayed correctly without delay.

Additional Info

Issue Type: Story
Status: To Do
Reporter: Muhilarasan I
Created: 2026-08-15T00:42:10.735+0530
Updated: 2026-08-15T00:42:10.915+0530

Generate Test Cases

Test Case ID		Category	Expected Result
TC-003	Dashboard displays correct number of inpatients	Positive	Dashboard loads within 2 seconds and shows a list of inpatients with correct counts and visual charts reflecting current data.
TC-004	Access denied for user without consultant role	Edge	Dashboard loads quickly and displays a friendly 'No inpatients assigned' message with an empty chart area.
TC-005	Session timeout redirects to login	Edge	All 500 inpatients are displayed in a paginated list and charts render correctly without UI distortion, load time ≤ 3 seconds.
TC-006	Dashboard displays error when backend service is unavailable	Authorization	User is redirected to an 'Access Denied' page or receives a 403 error message.
TC-007	Dashboard loads within acceptable performance threshold	Authorization	User is redirected to the login screen with a session timeout notification.
TC-008	Responsive layout on mobile devices	Negative	Dashboard shows a user-friendly error message like 'Unable to load inpatient data. Please try again later,' and no stale data is shown.
TC-009	Data consistency after patient status update	Non-Functional	Total load time is ≤ 2 seconds on a standard broadband connection.
TC-010	Dashboard handles slow network but remains functional	Non-Functional	Dashboard elements reflow correctly, charts are readable, and no horizontal scrolling is required.
		Positive	The updated patient status is reflected in the list and visualizations immediately after refresh.
		Edge	Dashboard displays a loading indicator, completes loading within 5 seconds, and shows correct data once loaded.
